September 1998

TO: Members of the House of Representatives

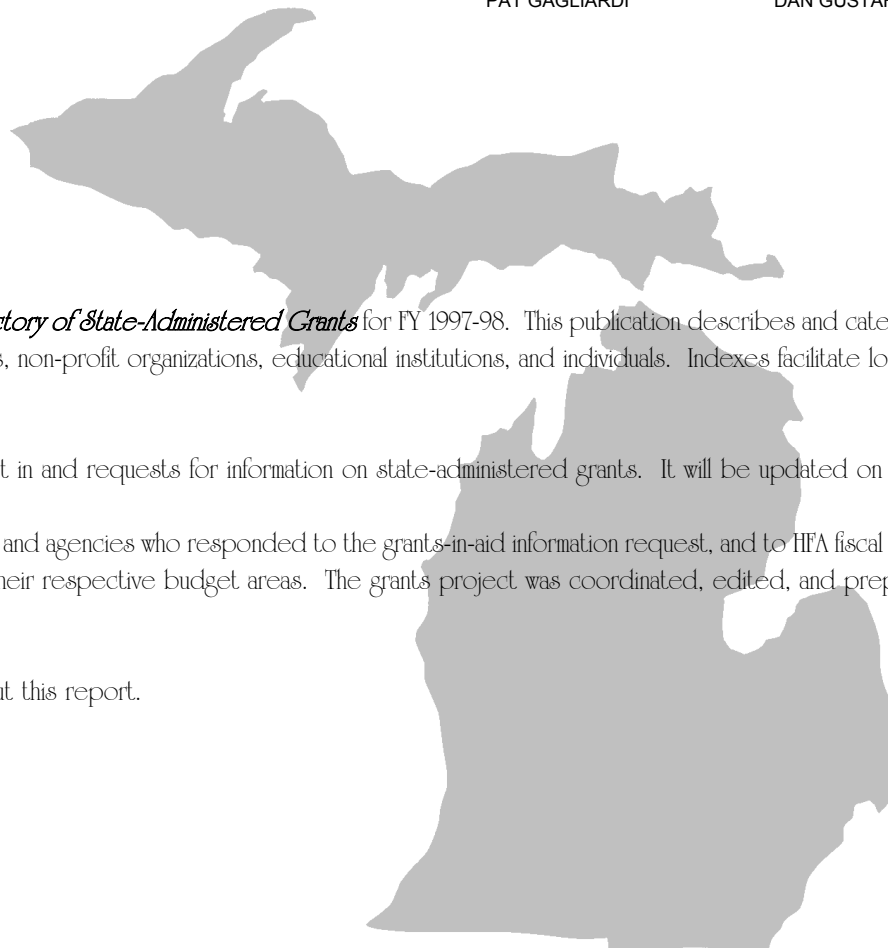

I am pleased to provide you with the House Fiscal Agency's *Directory of State-Administered Grants* for FY 1997-98. This publication describes and categorizes 180 reported grants-in-aid which are available to local governments, private organizations, non-profit organizations, educational institutions, and individuals. Indexes facilitate location of grants by category, by department, and by funding source.

This publication was prepared in response to legislative interest in and requests for information on state-administered grants. It will be updated on an annual basis.

Our thanks is extended to the many officials of state departments and agencies who responded to the grants-in-aid information request, and to HFA fiscal analysts (see inside back cover) who reviewed and verified the grants information reported for their respective budget areas. The grants project was coordinated, edited, and prepared for publication by Jeanne Dee, HFA's Administrative Assistant for Data and Publications.

Please contact us should you have questions or comments about this report.

James J. Haag, Director

INTRODUCTION

This *Directory of State-Administered Grants* has been designed as a reference for 180 reported grants available through 17 state departments or agencies. The grants in this directory are grouped into 25 categories, ranging from Aging to Veterans. Grant information is followed by a list of acronyms used in the publication and indexes of the grants by department and by funding source.

Each grant reference in this directory provides the name of the grant; a brief description of the purpose of the grant, the eligible applicants, and the method by which the grant allocations are dispensed; the amount of grant funds available in the FY 1997-98 appropriation and the source of those funds; and the phone number and name of the department through which the grant funds may be accessed.

In general, grants-in-aid are sums of money from federal, state, local, or private sources which are disbursed to qualifying units of local government, non-profit organizations, private organizations, educational institutions, or individuals. Grants-in-aid are usually authorized by federal and/or state statutes for specific purposes. However, before the grant funds may be distributed, they must be authorized by legislative appropriation.

To prepare this report, House Fiscal Agency fiscal analysts submitted a request for information, including a uniform reporting format, to each department. Information received from the responding departments was reviewed by HFA fiscal analysts and then synthesized to produce this *Directory of State-Administered Grants*. The House Fiscal Agency is grateful for the cooperation and assistance rendered by the staff of the departments who provided the information used to prepare this directory.
